Professional Summary

MCA graduate (2025) and Junior Laravel Developer with hands-on experience in PHP and Laravel development. Strong knowledge of backend development, RESTful API integration, database management, and performance optimization. Passionate about building secure, scalable, and real-world web applications.

Experience

Junior Laravel Developer

Apr 2025 – Present

Loyal Web Solution

- Developing scalable and secure Laravel web applications following MVC architecture.
- Designing and implementing RESTful APIs for dynamic data handling and third-party integrations.
- Optimizing MySQL queries and backend logic to improve application performance and load time.
- Implementing authentication, role-based access control, and form validation.
- Debugging production issues, performing testing, and assisting in deployment on live servers.
- Collaborating with frontend developers and participating in code reviews.

PHP Laravel Developer

Nov 2024 – Mar 2025

Mehta Infosoft Pvt. Ltd.

- Developed dynamic web applications using Laravel with clean and reusable code.
- Implemented complete CRUD functionality and database schema design using MySQL.
- Integrated external APIs and handled JSON data responses.
- Worked on form validation, session management, and basic security practices.
- Assisted in debugging, testing, and feature enhancement of existing applications.

Projects

Employee Management System (Hari Enterprise) — Laravel, MySQL

- Developed a full-featured employee management system to manage employee records, attendance tracking, leave management, and salary slip generation.
- Implemented role-based access control for Admin and HR users to ensure secure and authorized access.
- Designed a normalized and scalable database structure to maintain data integrity and system performance.

Hotel Management System (Khushi Hotel & Guest House) — PHP, SQL Server

- Designed and developed a hotel management system with room booking, check-in/check-out, billing, and customer management functionalities.
- Automated core hotel operations, significantly reducing manual effort and operational errors.

Ezi.Ma (Online Salon Appointment & Payment Platform) — Laravel, MySQL

2024 – 2025

- Designed and developed a live online salon management platform with online appointment booking and integrated payment functionality.
- Implemented real-time slot availability, service scheduling, and booking management.

- Integrated a secure online payment gateway for seamless service bookings and transactions.
- Developed admin and salon dashboards for managing services, bookings, customers, and payment records.
- Implemented authentication, role-based access control, and comprehensive form validation.
- Deployed, monitored, and maintained the application in a live production server environment.
